

## How do you make an alien cake?

In class 1 we wanted to find out how to make different coloured alien cakes

We cracked the eggs.

We measured out the butter, flour and sugar using the scales.

Then we mixed all of the ingredients together.

**After all of the ingredients were mixed we split the mixture into four bowls and added four different coloured food gels to each.**

**We mixed the colours together really well.**

**Once all of the mixtures were ready we put them into alien cupcake holders and baked them in the oven.**

When the cakes were cooled down we used different toppings to decorate our alien cakes.

They looked amazing once there were finished!!

Our alien

cakes!!!
